SECURITY DROP-BOLT LOCK

DIMENSIONS

- Operating voltage: 24Vdc
- Current 750mA
- 20 mm diameter steel bolt with a 15mm end taper to facilitate centring of the striker aperture, with 60mm extension (50mm throw.)

FEATURES

- Weatherproof all-metal construction with a black painted steel cover. It has a mechanical lock with 4 throws and a Euro-profile cylinder key override on one or both sides of the gates

APPLICATIONS

- The most common application is a high security electric deadbolt for automatic gates.
