

620 SR Automatic barrier for beams up to 3 m

240V super rapid hydraulic boom gate for beams up to 3m.

- Electro-hydraulic operator with lock in opening and closing
- Release system with triangular key
- Adjustable hydraulic deceleration
- Self-contained steel housing (STD models) or AISI 316 L stainless steel (STAINLESS STEEL models)
- 0.8/0.8 – 0.8/2.2 second opening, 100 cycles per hour.

Technical characteristics	620 SR LH/RH
Power supply	230 Vac (+6% -10%) 50 (60) Hz
Electric motor	Single-phase, bi-directional
Absorbed power	220W
Absorbed current	1A
Motor rotation speed	2.800 rpm
Pump flow rate	3 l/min
Thermal protection on motor winding	130°C
Electronic deceleration	Adjustable with cams
Operating ambient temperature	-20°C ÷ +55°C
Weight	80 kg
Type of oil	FAAC HP OIL (NEW)
Barrier body treatment	Cataphoresis
Paint	RAL 2004 polyester/stainless-steel
Protection class	IP 44
Cooling	Forced air
Type of beam	rectangular - round - pivoting round
